Johannes Zerwas

johannes.zerwas@tum.de
Research Assistant and PhD student
at Chair of Communication Networks

Research:

- Reconfigurable data-center topologies

- Adversarial benchmarking

Open questions/topics

- Impacts of reconf. topologies on applications and vice versa

- Scalability of reconf. topologies

- Adversarial benchmarks for "better" networks

- Are reconf. topologies the answer to future/malicious workloads?

- Data center traces / workloads

- Small / medium sized data-center testbeds
