

Tim Betzer

About Me

- B. Sc. and M. Sc. Informatics @ TUM
- Started this Month as PhD at the Chair of Network Architectures and Services

Research Interest

- Internet Measurements
- Emulating Internet Components
- Network Security

Tim Betzer

Poster: Graph-based Modeling and Analysis of the TLS Ecosystem

Open Questions

- How can different network components of a single organization on the Internet be identified?
- How should Content Delivery Networks in this context be handled?

- Can Internet Measurements be used to emulate network components in an isolated environment?
- Which and how much data is needed to accurately emulate network components?
