

About Me

- B.Sc. 'Infomatik plus Statistik' at Ludwig-Maximilians-Universität München
- Master studies at TUM
- Exchange at Lunds Universitet (LTH) in Sweden
- PhD at the Chair of Network Architectures and Services (Prof. Carle) since last month

Research Interests

- Internet measurement
 - DNS
 - Domain lifetime and live cycle dependent behaviour
- Reuseability of Internet measurement models
- Simplification of Internet measurement analyses
- Network security

- How to detect domain lifetime-dependent behaviour in large-scale Internet measurement data?
- How do domains offered on domain marketplaces behave?

- How could one efficiently reuse Internet measurement models without reimplementation?

- What features would you expect from an Internet measurement analysis platform?
- What data would you like to have accessible for your research?
