

Jörg Ott

- TUM, CS, Chair of Connected Mobility

Some current interests

- Internet transport protocols and QUIC
 - Real-time, multipath
 - QUIC-based overlays (MoQ, ...)
 - Point clouds
- Network architectures for confined environments
 - Pub/sub and ICN for in-vehicle networks
- (LEO) satellite networks
 - Performance, perspectives, opportunities
- Edge and in-network computing
 - Orchestration
- Ethics and privacy

Questions

- Intermediaries in a world of secure e2e transport
 - Discovery
 - Integration into protocols and systems
- Space networking ++
