

BUILD WEB APPLICATION

Apply state-of-the-art technology and bring our Software to the next level!

Pyoneer - Next Generation of Product Management - based on Design Thinking!

We believe that the next generation of Product Management is customer-centric! Pyoneer is a cloud Product Management Software (SaaS) that revolutionizes the way companies build products! It offers the toolset of Design Thinking and Lean Startup to analyse customer needs and problems to ensure teams build the RIGHT product!

About the IDP

Work closely with us on your own project. The majority of the work will be in VueJS

- The project involves more than just coding: Your input to UX and Design is wanted
- The exact project requirements and milestones will be defined at the kickoff
- Individual or team 👉 your welcome 🐾

Your Experience

- You already have some experience in web development (HTML, CSS)
- Development experience in at least one of the following: JavaScript, React.js, Node.js, Vue.js

Ideas on your project

- Develop Analytics Dashboard
- Concept and Design Interface
- Connect Front- & Backend
- Real-time API Development
- We would love to see YOU contributing your own ideas to the project!

WHY JOIN US

Steep Learning Curve

- 👉 Innovative technologies on a modern tech stack (Elixir, Phoenix, VueJs, AWS)
- 👉 Development of scalable and data-intensive systems

Flexible

- 👉 Freedom to schedule your work as it fits your needs
- 👉 Take full responsibility for your project

Perspective

- Your development will have a great impact on our product and the product strategy.
- 👉 Grow with us as one of our first Employees
- 👉 Stay with us and get equity!

Fun & Convenience

- Our office is at the LMU Entrepreneurship Center Accelerator (U-Bahn Giselastraße)
- 👉 Great Startup atmosphere
- 👉 Meet Serial Entrepreneurs
- 👉 Join all our team events
